This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1   1. (currently amended) An image display method for
2   displaying description data including predefined attributes
3   each having text information and image information as an
4   attribute value described in a predetermined description
5   format, said image display method comprising the steps of:
6   extracting said attribute values from the description
7   data ;
8   listing the text information of the extracted attribute
9   values <u>as alternative character strings to images</u>
10   <u>inline displayed in the description data</u>;
11   selecting at least one attribute value from among the
12   listed attribute values; and
13   reading and displaying the image information specified by
14   the selected attribute value.

1   2. (canceled).

1   3. (original) The image display method as claimed in
2   claim 1 wherein said step of listing the extracted attribute
3   values lists file names indicating locations of images inline
4   displayed in the description data.

1   4. (original) The image display method as claimed in
2   claim 3 further comprising the steps of selecting a format of
3   images inline displayed in the description data based on the
4   attribute values and listing images in the selected file
5   format.

1   5. (currently amended) A portable terminal comprising:

2   a display section for displaying description data

3   including predefined attributes each having text

4   information and image information as an attribute

5   value described in a predetermined description

6   format;

7   image selection and display means for extracting said

8   attribute values from the description data and

9   listing the text information of the extracted

10   attribute values <u>as alternative character strings to</u>

11   <u>images inline displayed in the description data</u>, and

12   for selecting at least one attribute value from

13   among the listed attribute values, reading the image

14   information specified by the selected attribute

15   value, and displaying the image information on the

16   display section.

1   6. (canceled).

1   7. (original) The portable terminal as claimed in claim 5

2 wherein the attribute values are file names indicating

3 locations of images inline displayed in the description data.

1   8. (original) The portable terminal as claimed in claim 7

2 wherein further a format of images inline displayed in the

3 description data is selected based on the attribute values,

4 images in the selected file format are listed, and an image in

5 any desired format is displayed on the display section.

1   9. (currently amended) A display method for displaying a

2 representation of a document on a portable display, said

3 document having one or more images, wherein the document is

4 described in a data file using a predetermined description

5 language including predefined attributes each having values of

6 text information about one of the one or more images, said

7   display method comprising the steps of:

8   extracting, from the data file, the corresponding

9   attribute values of text information for each of the

10   one or more images;

11   listing the corresponding attribute values of text

12   information on the display <u>as alternatives to inline</u>

13   <u>images displayed in the description data;</u>

14   selecting at least one of the listed attribute values;

15   and

16   displaying, on the portable display, image information

17   about the image corresponding to the selected

18   attribute value.

1   10. (canceled).

1   11. (previously presented) The method of claim 9, wherein

2 said image information includes a graphical representation of

3 the image.

1   12. (previously presented) The method of claim 9, wherein

2 said image information includes information about a file of

3 the image.

1   13. (previously presented) The method of claim 9, wherein

2 said image information includes an indication as to whether

3 the image can be displayed.

1   14. (currently amended) A method of displaying, on a

2 portable display, a web page described by one or more data

3 files, said web page having one or more images, said method

4 comprising the steps of:

5   extracting, from the one or more data files,

6   corresponding attribute values including textual

7   information for each of the one or more images;

8 listing the corresponding attribute values on the
9   portable display <u>as alternatives to inline images</u>
10   <u>displayed in the description data</u>;
11 allowing a user to select one of the listed attribute
12   values; and
13 displaying, on the portable display, image information
14   about the image corresponding to the selected
15   attribute value, wherein said image information
16   includes a non-graphical representation of the
17   image.

1 15. (previously presented) The method of claim 14,
2 wherein said non-graphical representation of the image
3 includes a textual description of the image.

1 16. (previously presented) The method of claim 14,
2 wherein said non-graphical representation of the image
3 includes information about a file of the image.

1 17. (previously presented) The method of claim 14,
2 wherein said image information further includes a graphical
3 representation of the image.

1 18. (previously presented) The method of claim 14,
2 wherein said non-graphical representation of the image
3 includes an indication as to whether the image can be
4 displayed by the portable display.
